**GUIDED ACCESS**

Guided access is useful for stopping children leaving Apps or hitting buttons you don’t want.

**To set up Guided Access:**

Go to **Settings**

Select **General**

Select **Accessibility** (near bottom)

Select **Guided Access**

Turn **Guided Access** ON

Set Passcode – make sure it’s easy to remember like your year of birth and write it down in Notes

**To activate Guided Access:**

Triple-tap the Home button (quickly press the Home button three times).

Optionally, circle areas of the screen you would like to disable. Optionally, turn off Motion (locking iPad in portrait/landscape).

When finished, tap Start. Guided Access is now enabled.

To exit Guided Access, triple-tap the Home button, and enter your four-digit passcode.

Thanks to Rob Hough at [http://childrenstherapy.org](http://childrenstherapy.org) for this useful guide.
